

Sourcing appropriate labels and signs can often be time consuming and costly, especially where only small quantities, specifically worded, or exact sized outputs are required. This is where the CPM-100G3/HG3 allows you to effect huge cost savings and operational improvements, by producing exactly what you want, when you want it... 24 hours a day!

Because the system handles individual shapes and sizes, there's no need to buy customised blank labels. For customers who need to label high-value, low quantity equipment in a professional manner, the CPM-100G3/HG3 is ideal.

## Standard Supplies

The approximate remaining vinyl length can be checked visually by fitting it to the printed gauge of the box of the vinyl.

## Save Time, Save Money, Improve Processes with Bepop

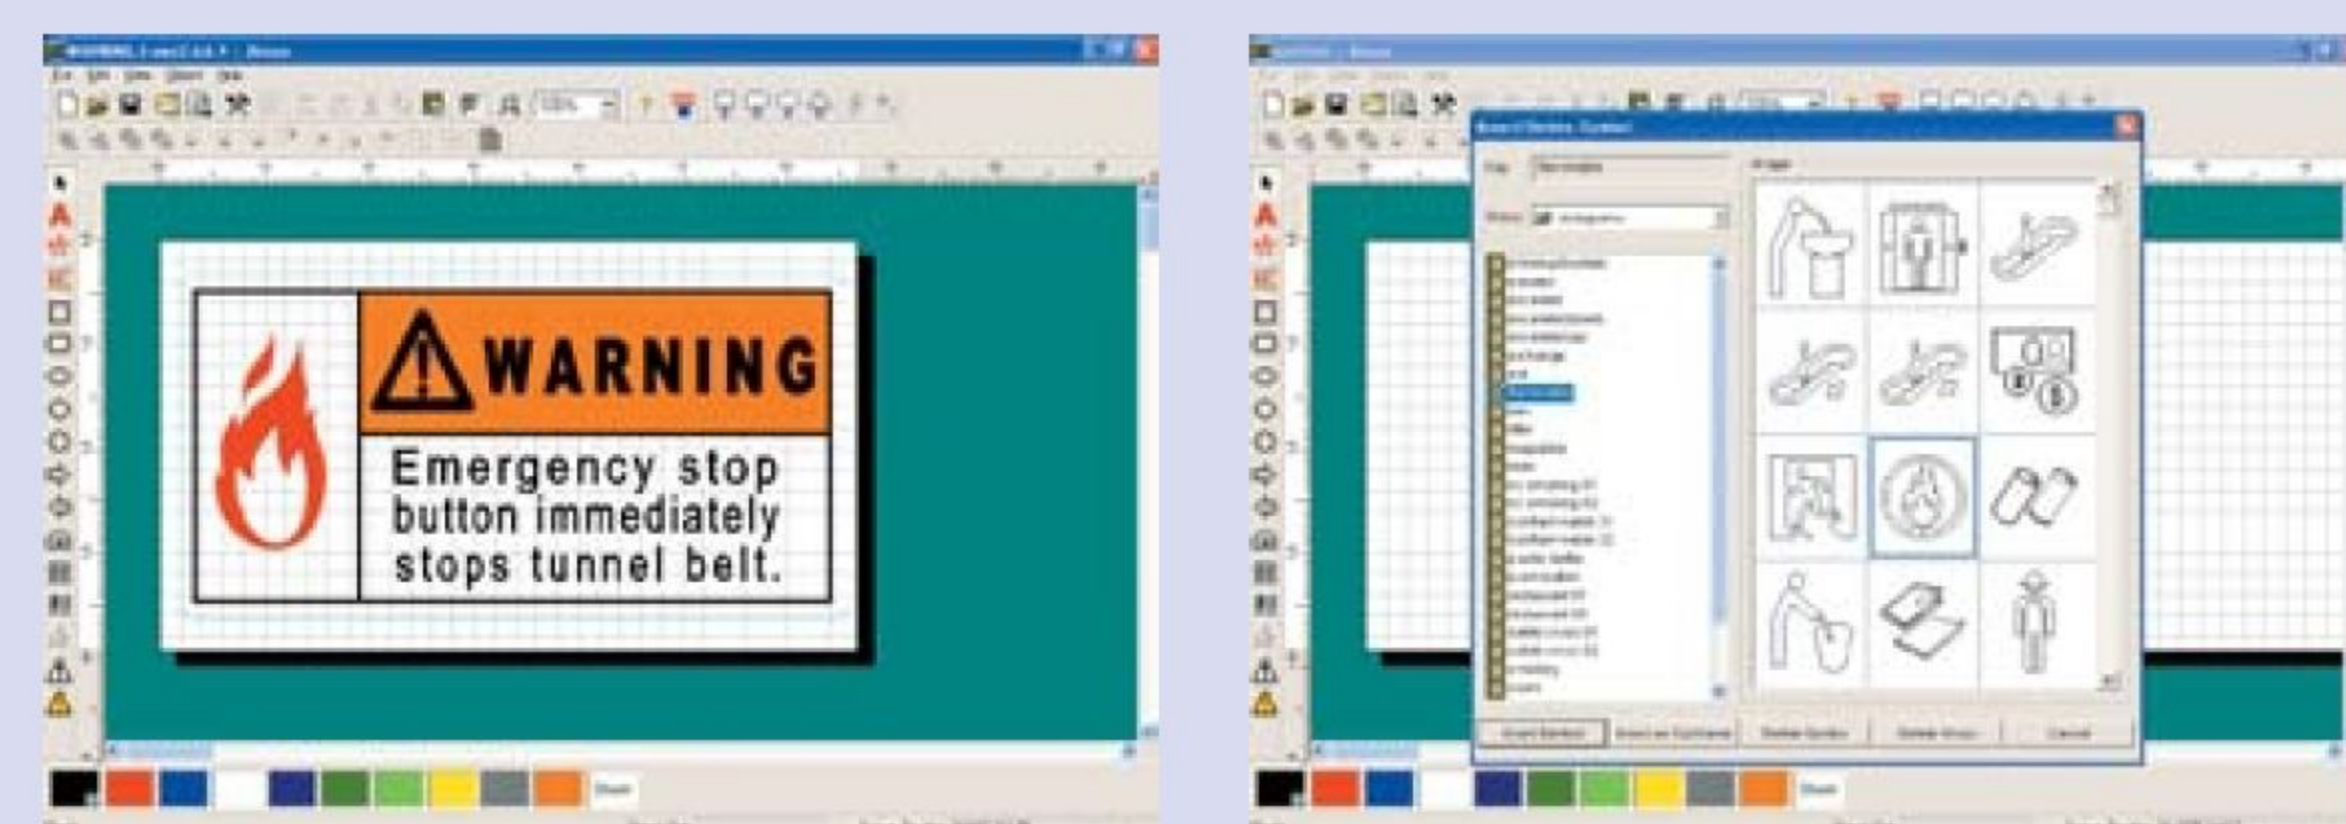

### Thermal print and vinyl-cutting technology

In a single process, Bepop prints and then cuts out, to produce exactly what you want!

Bepop can print, then cut out labels in any shape.

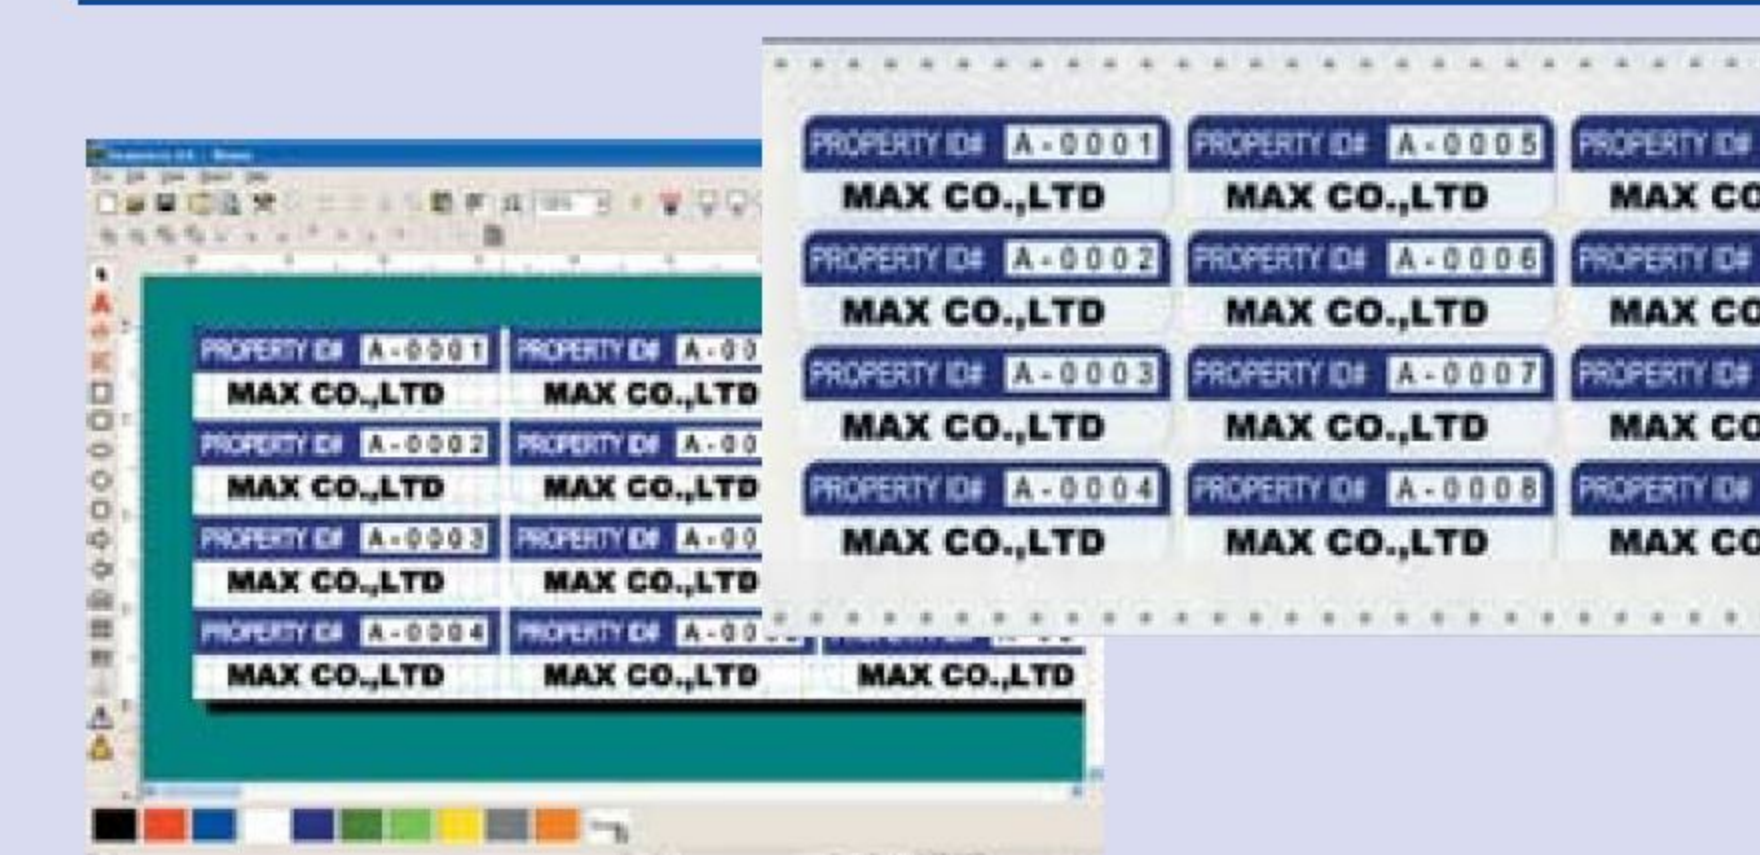

### Easy operation

CPM-100G3/HG3 comes complete with dedicated "Bepop PC" Software. This application enables you to quickly and easily design labels on your PC. The software includes pre-defined templates and symbols gallery, to bring a professional look to your designs.

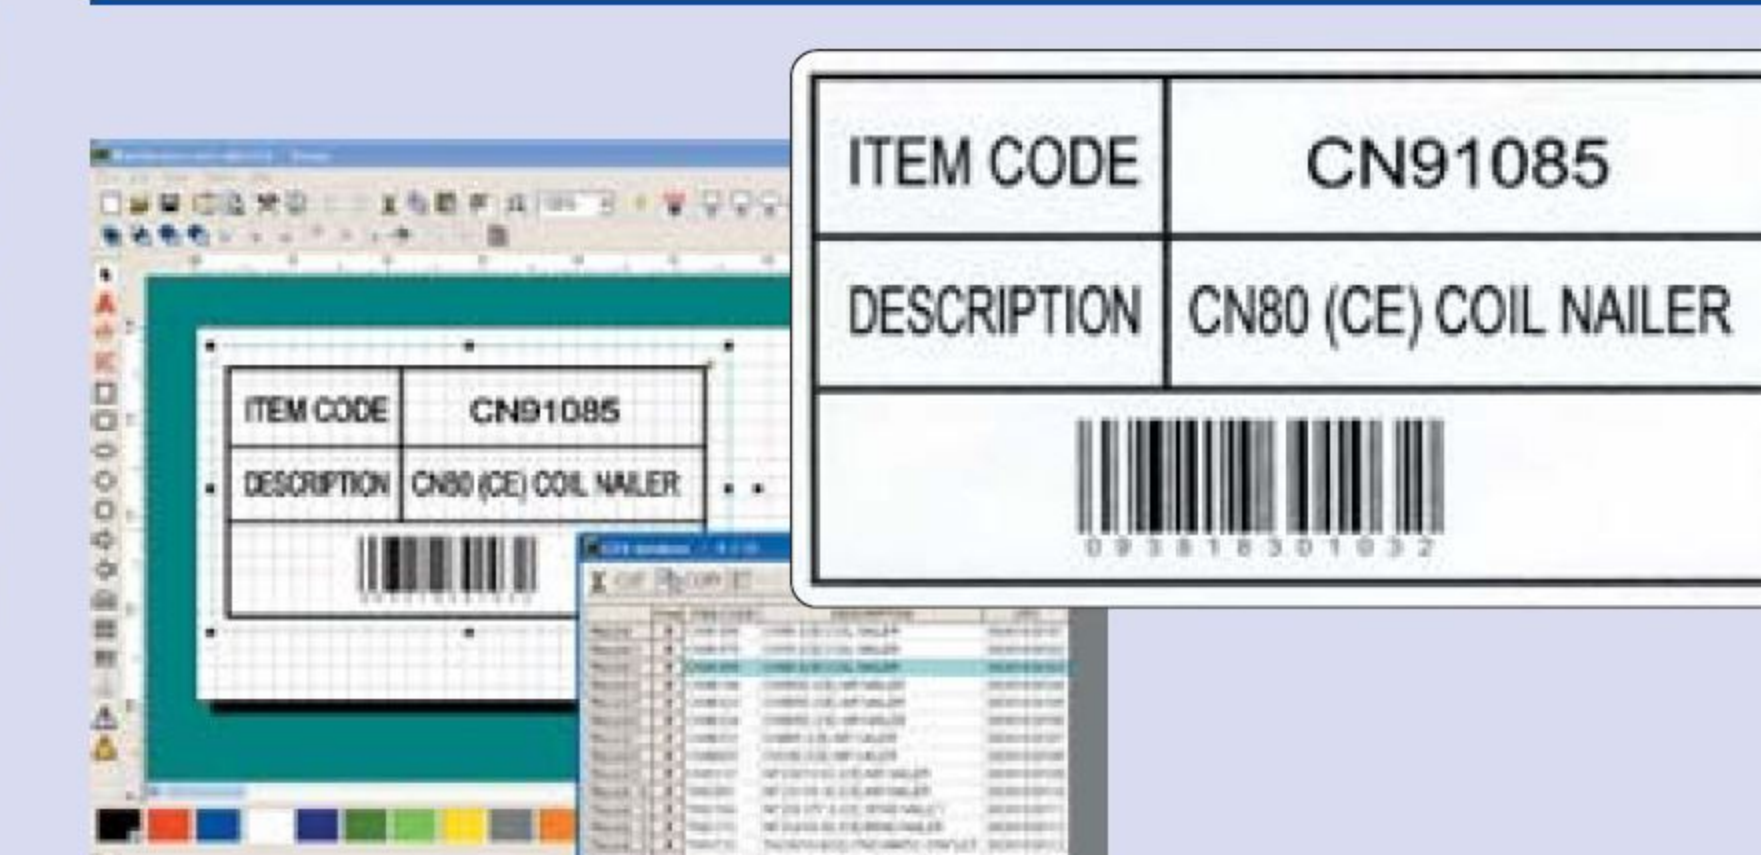

### Sequential Numbering

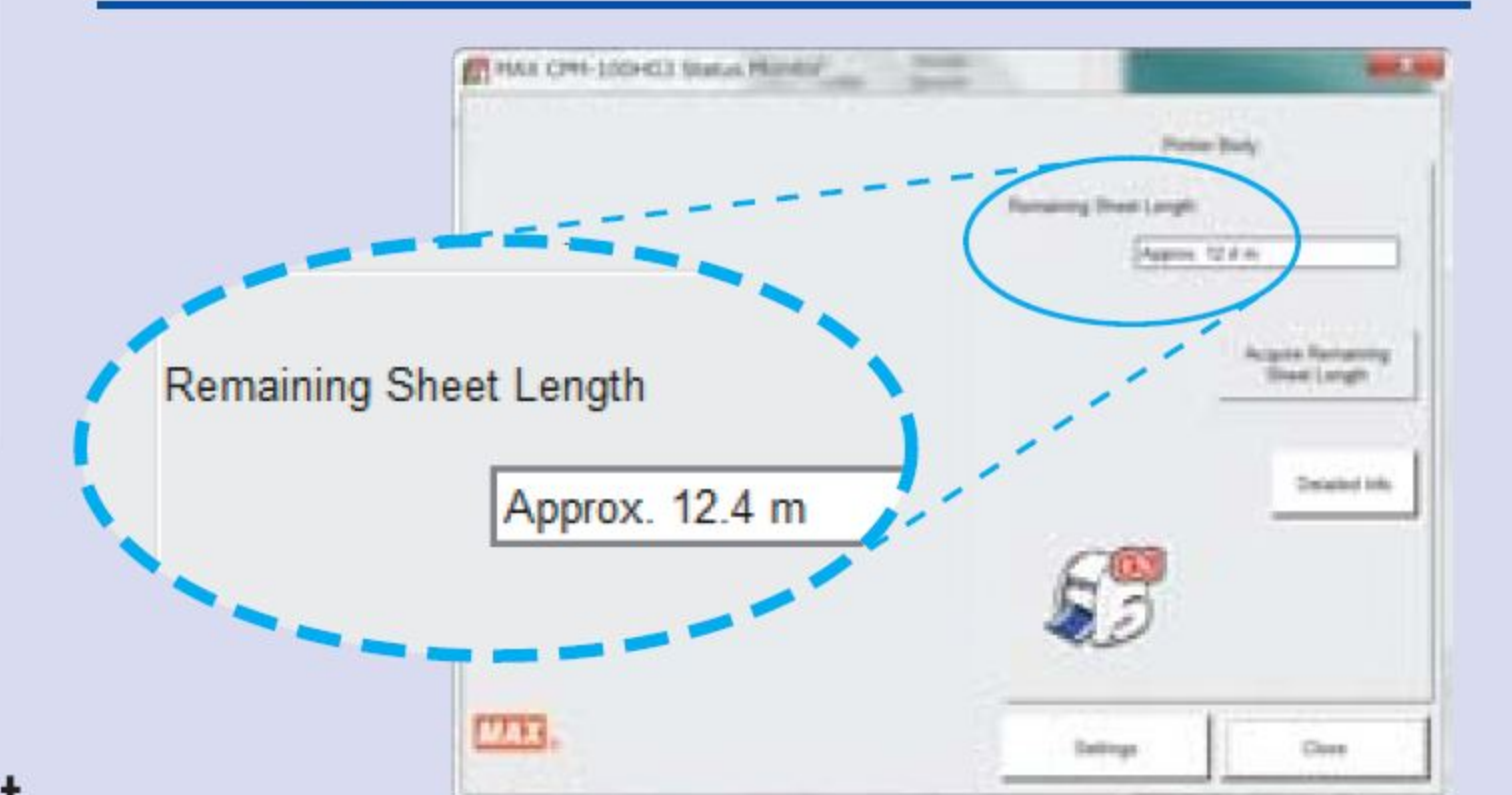

Designs can automatically include sequenced numbers using variable increments.

### Database Link

Information from databases saved in CSV format, can be linked directly to your label designs.

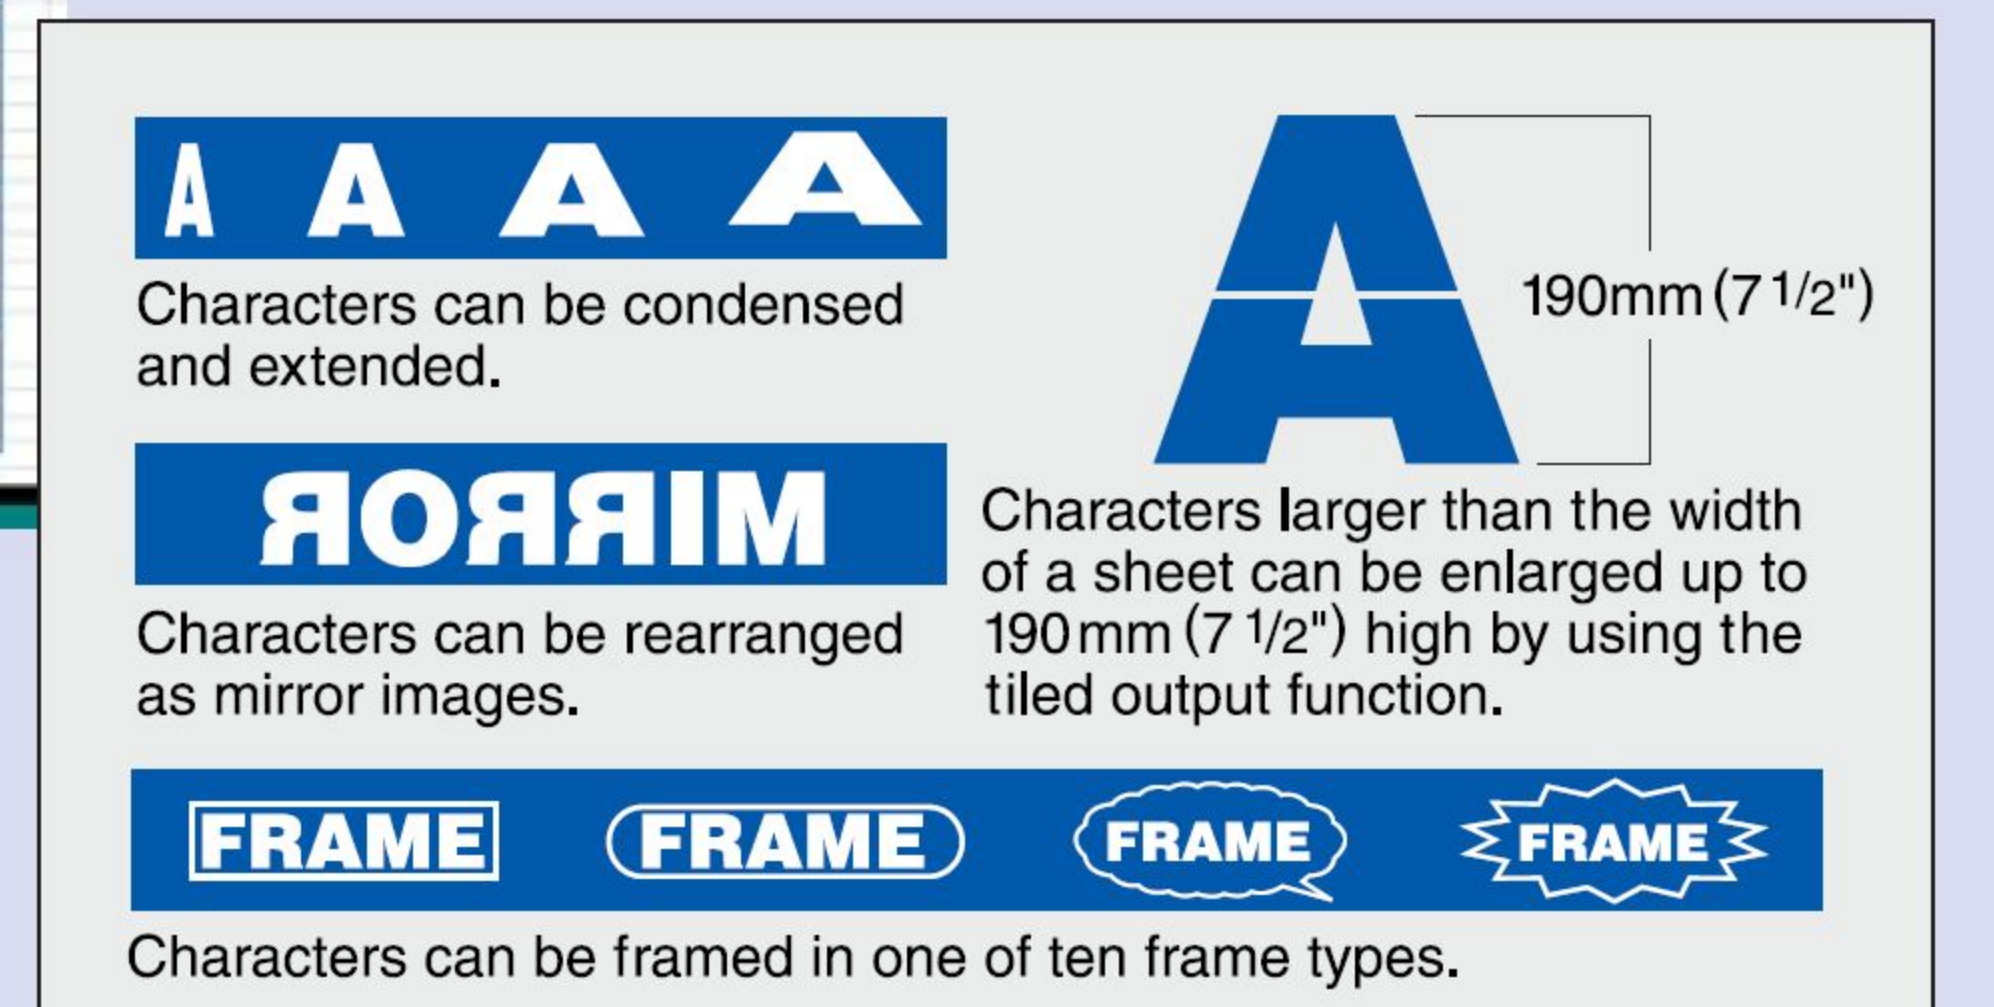

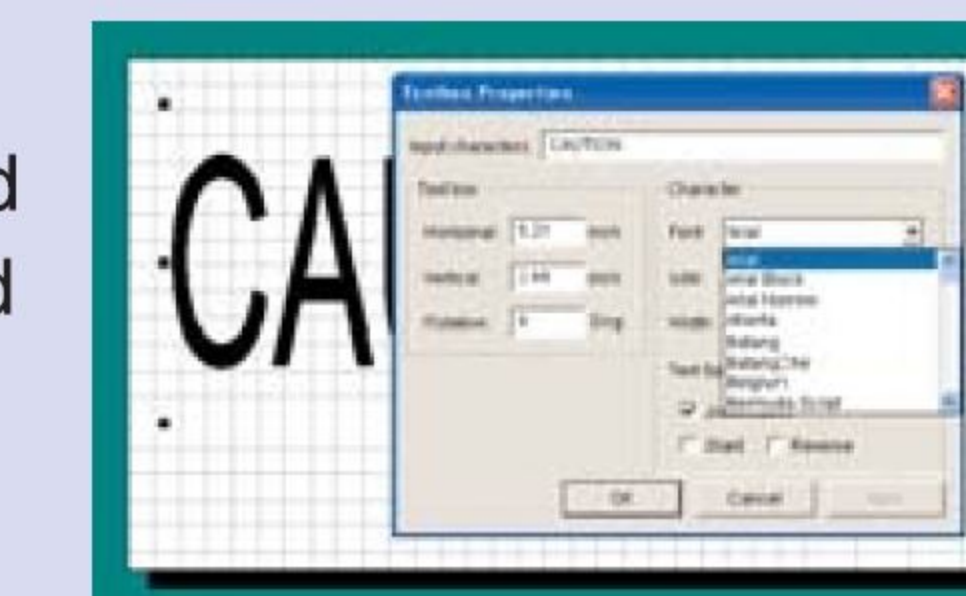

### Remaining Vinyl length detection

The approximate remaining vinyl length can be checked at the status monitor in the notification area of desktop.

### Other software features include;

- Use any True Type font installed on your PC.
- In addition to the built-in symbols gallery, you can download more symbols free of charge, from our website. Logo's and other graphics can easily be converted and edited.
- Features inserting and designing tables.
- Text can be curved, arched, mirrored, slanted, reversed, italicized, condensed, extended and framed.
- 10 major bar code languages built-in.
- Insert and print objects from the other software applications, such as Microsoft Word, Excel, PowerPoint and Cliparts.
- Printed text can automatically be contour-cut, with a totally adjustable border size.
